

Community Living
London

Does your business include People with Disabilities?

Since 2001 funding provided by the Government of Canada has allowed Community Living London to employ two Employment Specialists. The Employment Specialists work exclusively with individuals who have a disability to develop their work skills. Area businesses are a key component to providing a natural work experience supported by our Employment Specialists. Businesses who have opened their doors and provided a work placement have expressed that this initiative enhances their community connections. Our services are provided at no cost to the participating businesses.
